Skills

- Experience with the **React** library in writing single page applications using **React Router**, **hooks**.
- Experience with **Vite** for create React App.
- Experience with State Management in React Using **Redux Toolkit** and **Zustand**.
- Experience with framework **Next JS** for create web applications with server-side rendering.
- Experience with React libraries that allow you to import and use components for the user interface in applications — **Material UI**, **Tailwind CSS**, **Bootstrap**.
- Proficiency in J**avaScript** and **TypeScript**.
- Experience with database program the **MongoDB**.
- Learning and practicing **Supabase**.
- Experience with **Node.js Express** server for building web applications.
- Experience with REST API / HTTP methods.
- Experience with online service for interface development and prototyping **Figma**.
- Experience building web applications with responsive design.
- Using the SCSS CSS preprocessor to write styles quickly.
- Experience with the task manager **Gulp 4**.
- Experience with the module builders **Webpack 5**.
- Experience with **Git** .

Work experience

2015 – present:

I practice the **React JS** library when writing single page applications (SPAs), and use progressive libraries and tools to make the web application more interactive and user-friendly.

Links to examples projects on website
— **https://vitalgol.github.io/GoloborodkoCV.**

In some projects I used a database management system — **MongoDB**.

I use some **CSS frameworks** to speed up the coding of React apps.

I write codes for cross-browser and responsive websites of any complexity using **HTML5**, **CSS3**, **JavaScript**. To automate the web development process I use a task manager — **Gulp 4** and module builders — **Webpack 5**.

A tool for setting up a web application development environment with the React JS library using — **Vite JS**.

If necessary, I use the design and prototyping tool **Figma**, which allows creating website designs and graphics editor **Photoshop** for editing raster images.

In my work I use a package manager to install libraries — **NPM** and a platform for project hosting and collaborative development — **GitHub**.

I never stop learning new knowledge and practicing code.

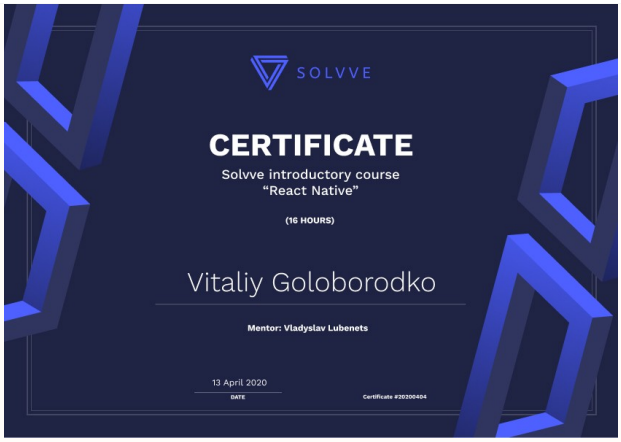
Education

1986–1991: Dnepropetrovsk Institute of Railway Engineers.
Faculty: Electronic Computers.
Speciality: Systems Engineer.

Courses

August, 2022. Udemy.
Course "Become A Full Stack Web Developer - Beginner To Advanced"

March, 2021. SoloLearn.
Course "React + Redux"

May, 2020. Udemy.
Course "The Complete Full-Stack JavaScript Course!"


April, 2020. SOLVVE.
Course "React Native"
